

Brushes **TECAL**®

For cleaning HVAC systems

nylon brushes

Brushes are located between the brushing robot and the duct to be cleaned, undoubtedly an element of great importance to achieve a more effective cleaning in both circular and square ducts.

Ideal for maintenance and cleaning of delicate ducts constructed of coated glass fiber foil Excellent flexibility and elastic recovery. Fine Nylon brushes are highly recommended to combinations in square ducts with nylon brushes.

Adapters for equipment
purchased before August 2015

ADAPTER ROTAIR

ADAPTADOR ONE
Accessory to use a single brush
on the shaft of the brushing robot.

AC6470050

ADAPTER PROAIR

ADAPTADOR DUO
Accessory to use double brushes
on the motor shaft for the brushing
robot.

AC6470030

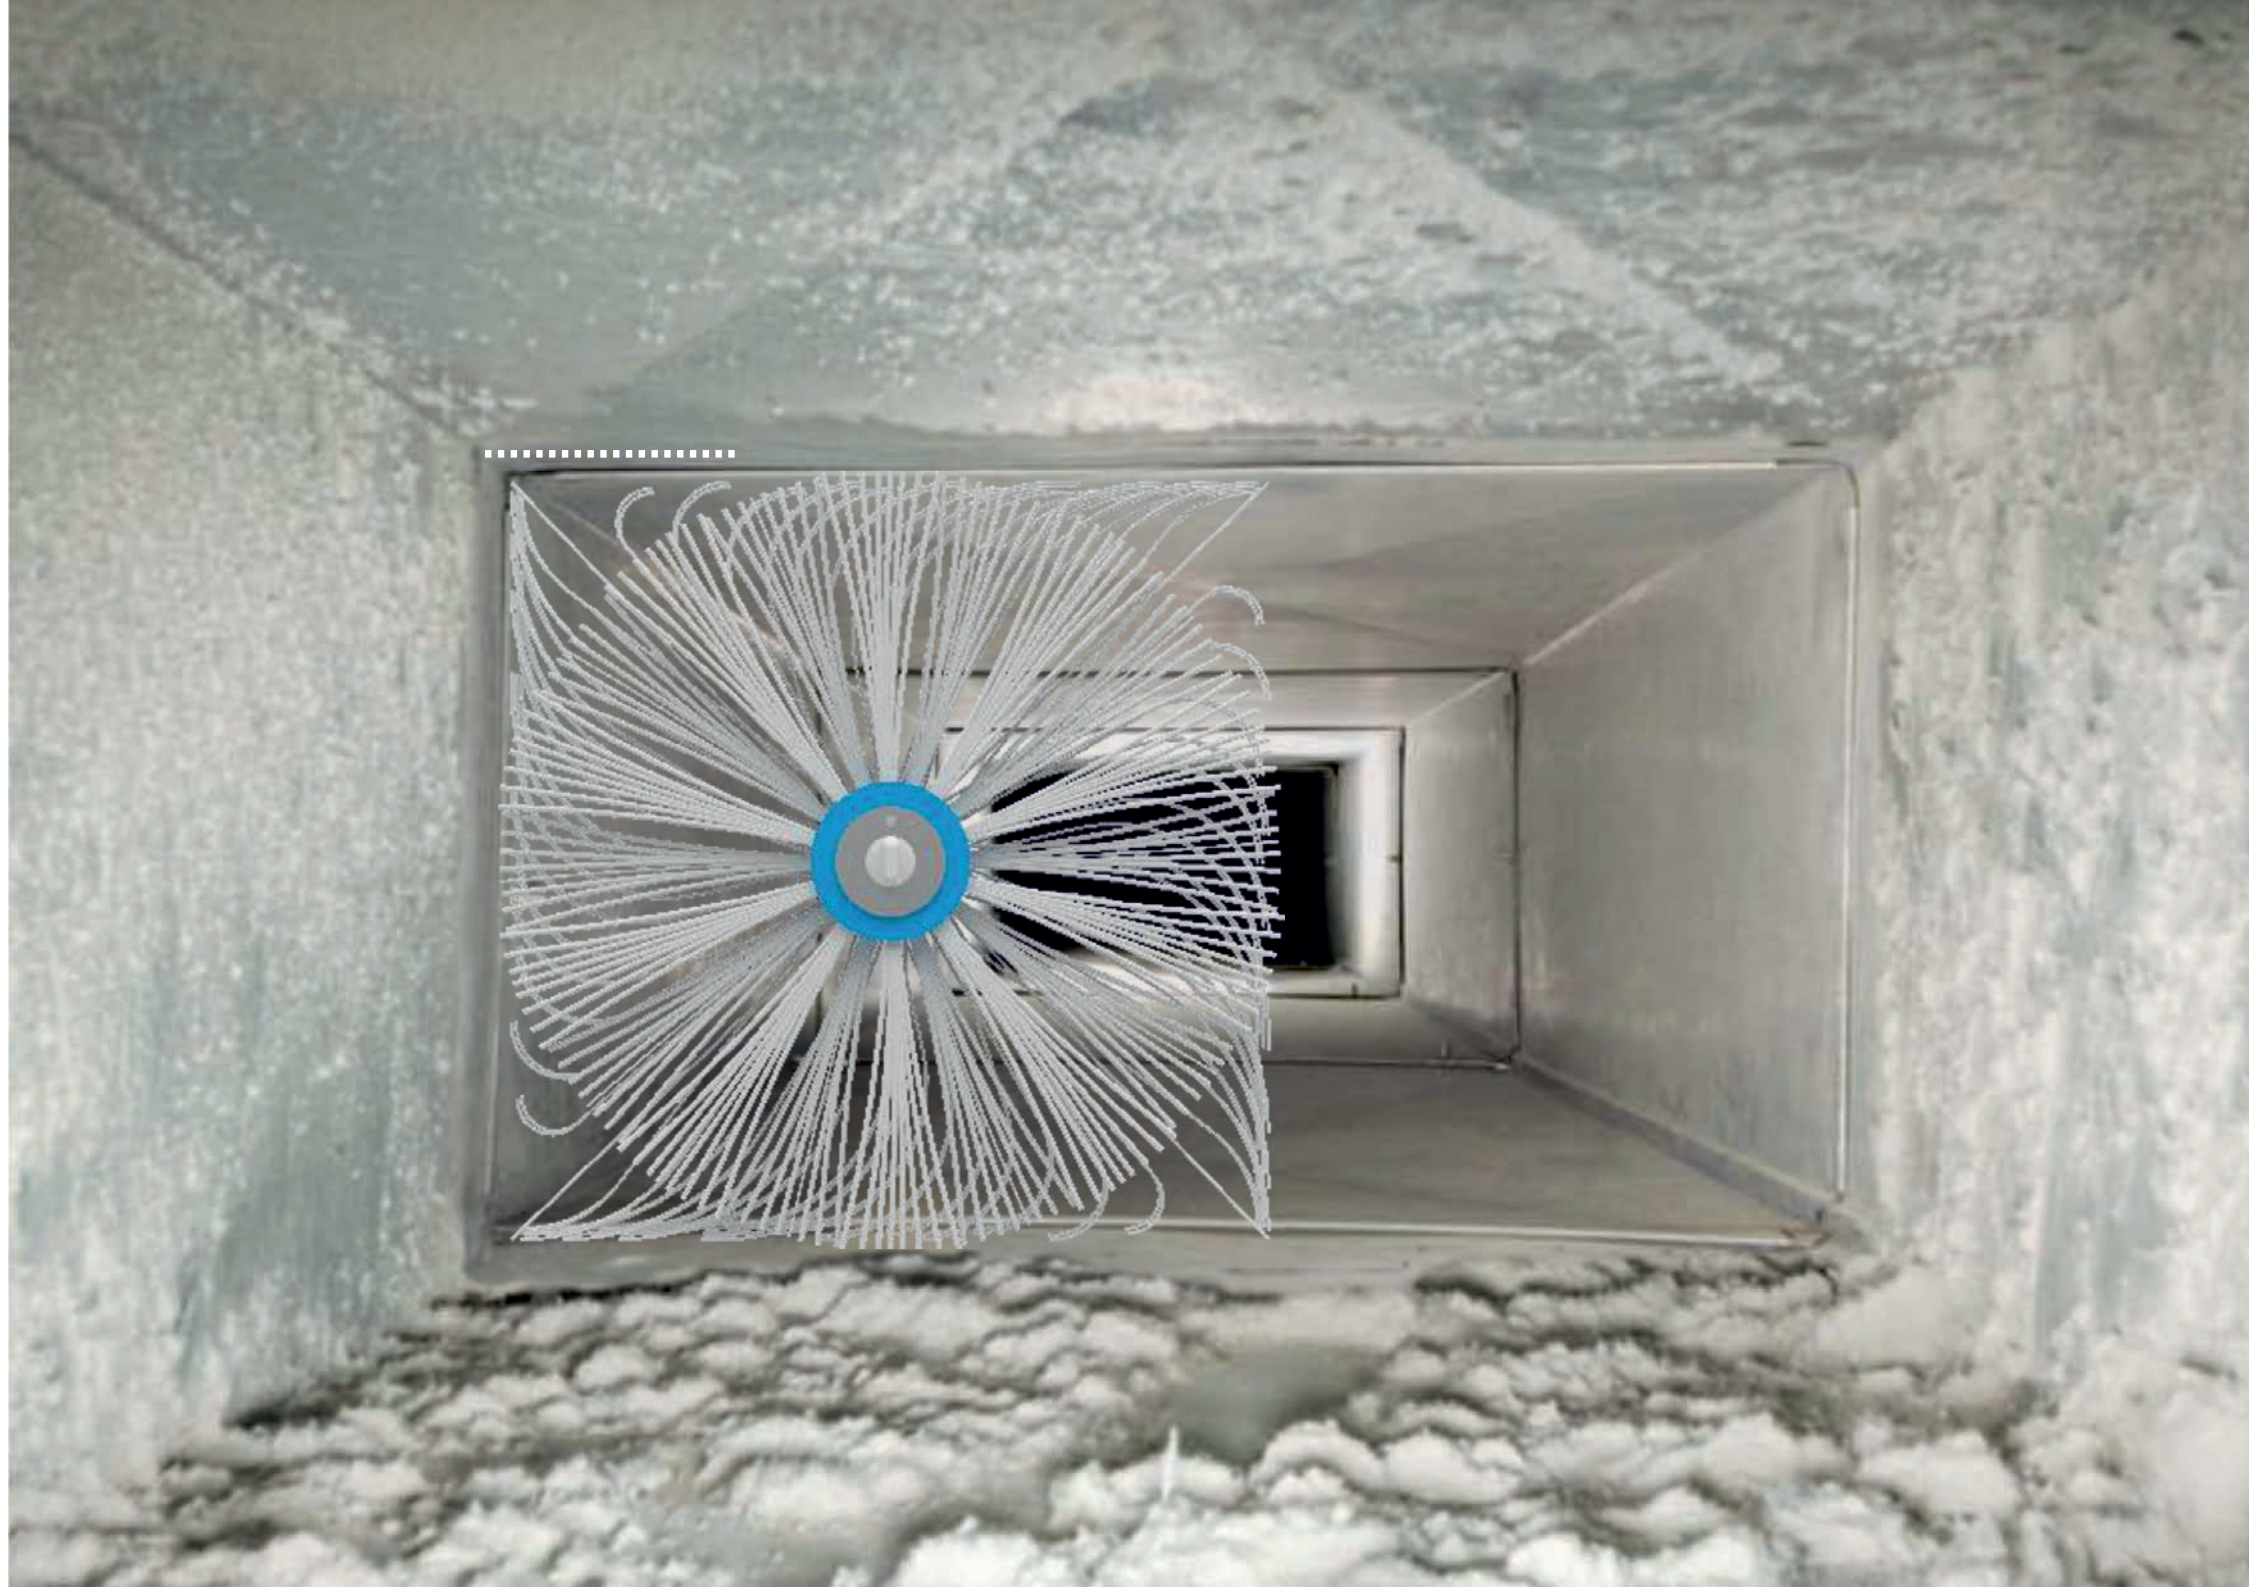

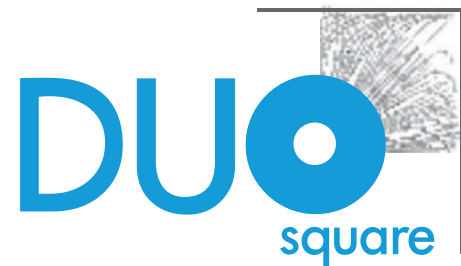

ADAPTADOR ONE
Accessory to use a single brush
on the motor shaft for the brushing
robot.

AC6470040

Brushes for SQUARE DUCTS

The **DUO Square** is the ultimate solution to reach the most difficult dirt in the corners of square ducts.

BRUSHES FOR SQUARE DUCTS - PROAIR

The cleaning of a square duct requires the use of a combination of two brush modules with different diameters, material and thickness of the bristles. The DUO Square system combines two rows of brushes, the outer module is always the same size as the duct height, however the inner module requires a specific dimension to achieve effective brushing in the corner.
